

## R- Installation steps.

1. Download R software for Windows (3.5.1) from <http://cran.r-project.org/bin/windows/base/>
2. Run the R set up (exe) file and follow instructions
3. Double click on the R icon in the desktop and R window will open as follows;

**You need to be online during installation, as some packages will be downloading during installation.**

**4. Within R window, then type**

```
>install.packages("Rcmdr", dependencies = TRUE)
```

```
>install.packages("RGtk2", dependencies = TRUE)
```

**5. Within R window type**

```
>library(Rcmdr)
```

**The R-commander session will load as follows:**
